

# How to Upgrade to StatsLab 3.0

---

StatsLab 3.0 has some new features that required some of the underlying database tables to be rewritten. There are OOTP12 and OOTP13 versions of StatsLab 3.0, and the upgrade process is the same regardless of which version of OOTP you're using.

The upgrade process assumes you were previously using the old version of StatsLab12.

**PLEASE READ THESE INSTRUCTIONS IN FULL BEFORE DOING ANYTHING!**

## Upgrade Steps

Here are the basic steps for upgrading StatsLab, in short:

1. Create a backup copy of your old StatsLab install as well as the MySQL database
2. Log in to your old StatsLab install with a commissioner account
3. Go to the Admin section of StatsLab.
4. Upload the new StatsLab code to your server.
5. Upload the upgrade\_3\_0.php file to your StatsLab install folder on your server.
6. From the browser window where you are already logged in, manually change the url to point to the upgrade\_3\_0.php script.
7. You should see the script run with several messages indicating success.

## Upgrading to StatsLab12 3.0

8. Confirm that you can navigate around StatsLab without errors just as before.

You're all done!

## Upgrading to StatsLab13 3.0 from StatsLab12

8. Upload your OOTP13 MySQL dump to your SQL folder on your web server.
9. Go to sql\_file\_load.php and begin loading your SQL files.
10. Confirm that you can navigate around StatsLab without errors just as before.

You're all done!
